

Realco completes Ozas Park Project in Vilnius

The real estate development company Realco has completed the development of Ozas Park in Vilnius. The new housing estate situated between Kalvariju, V. Gerulaičio and J. Balčikonio Streets, is already home to more than 1700 families. Realco investments into Ozas Park totaled over 110 million euros.

“Older residents of Vilnius can still recall the abandoned area in this site which was covered with brush and served as a dumping ground. We take great pride in this modern residential estate, the re-cultivated green park and the convenient transport infrastructure developed within the area. It took a decade of intense work,” says Julius Dovidonis, CEO of Realco.

According to him, today Ozas Park can be seen as a miniature city offering ideal opportunities for comfortable living, work, leisure and recreational activities.

There are various service providers in the vicinity of Ozas Park including private kindergartens, hair salons, family and dental clinic, beauty parlours, various stores and schools.

The housing estate is located near business centres, shopping and entertainment centre Ozas, Siemens Arena hosting major events under its roof, Vichy Aqua Park offering aquatic entertainment and sauna facilities, and DELFI Sports Centre.

In 2012, Realco completed the cultivation of the 9-hectare park near the housing estate. The developers of Ozas Park reclaimed the ponds within the park, planted a few hundred new trees, installed benches and pedestrian walks with rest areas. The park is the first one in Vilnius to accommodate a stationary disc golf course accessible to all city residents.

Following Realco’s announcement of the completion of Ozas Park development, city residents still have the opportunity to make it their home. This residential estate can still accommodate 170 families.
